Aloha Fenix,

I am not sure what data and determination LeDean is referring to. I am hesitant to respond as your agency is in the lead for this issue. Have you communicated with her directly?

I wanted to touch base with you on the matter of what was found in the air of our home in Hawaii. Is it accurate that the Hawaii Dept of Health can rule an area safe even if it has levels of pesticides in the air that exceed YOUR (the USEPA) safety guidelines??? This is what we are being told. Did you get a copy of the FINAL report from Hawaii or Hickam Communities of the air sampling that was done at the house we lived in? It was provided to us in Feb so you should

have gotten a copy by now I would assume. If not please let me know and I will provide one. We would really like to hear from you on this matter as the Region 9 representative for the USEPA. Thank you

LaDean

Aloha Fenix,

Any new developments re this on your end? Hope all is well! Angeles

Please excuse my typos

Hello,

I am not sure if you have gotten copies of these reports from HIDOH or Hickam Communities, we have been relocated to Virginia so that our family can be seen and treated by a Medical Toxicologist due to the findings of the air samples performed on the indoor air of our home provided to us by Hickam Communities. Attached are the results of the air sampling that they performed, you have already been sent the ones that were analyzed by Dr Richard Cassidy from us. I will also be forwarding the Chromatograms of the testing that they performed.

They were supposed to be completing a second set of testing and providing us with a comprehensive report from BOTH air samples that they performed with all the data including the additional chemicals they had mentioned being found and to date, we have not gotten anything from them even with repeated attempts to contact them.

As you know the Hickam Communities and the HIDOH developed an environmental action level which is higher than the EPA PRGs. The controls by the contractors were poor at best and we continue to see chemicals and pesticides in areas that they should not be according to the HIDOH.

We would like to know if now the EPA can step in to help.

LaDean

I appreciate that you are frustrated by the ongoing efforts to analyze the condition of your residence. We are doing our best to gather and analyze the data to get a complete picture. This is where we are in our ongoing investigation process:

1. We need additional testing to confirm the prior testing methodology and determine whether certain test data readings are affected by factors such as your dog grooming business, dry cleaning or other chemical sources.
2. Before the next testing date, we need to make sure that you do not perform any pet grooming for two days prior to the test and also not release any other chemicals from other sources that may affect the data.

3. Once that test is completed, we will compare the data from the tests and also consider your history of product use. We do see videos that depict air dryers blowing hair and dust while dog grooming so we need to determine if that is a factor.
4. We have also reported the progress of our investigation to the DOH. A copy of that letter and the existing data results are attached. Once we complete the next phase of our planned testing, and review your history from answers to the questionnaire, we will provide a final comprehensive report.
5. I do not have the chromatograms as of yet as they do not typically come in the report however they have been requested and I will get those to you.
6. I have attached the questionnaire again so that you have all the documents in one location.
7. We are putting together the MSDS information you requested and will have it to you Monday.

So please contact me right away to schedule access for the additional testing. I appreciate your patience and cooperation in this ongoing effort. Thank you.

Best Regards,

Jim Switzer
